

## For the prevention and treatment of pressure ulcers

**Security Straps:**

Corner straps secure and centre the Mattress Overlay onto the bed.

**Material:**

High grade, antimicrobial TPU material (latex free) with optimal envelopment and immersion properties to ensure clinical efficacy and patient comfort.

**Handwells:**

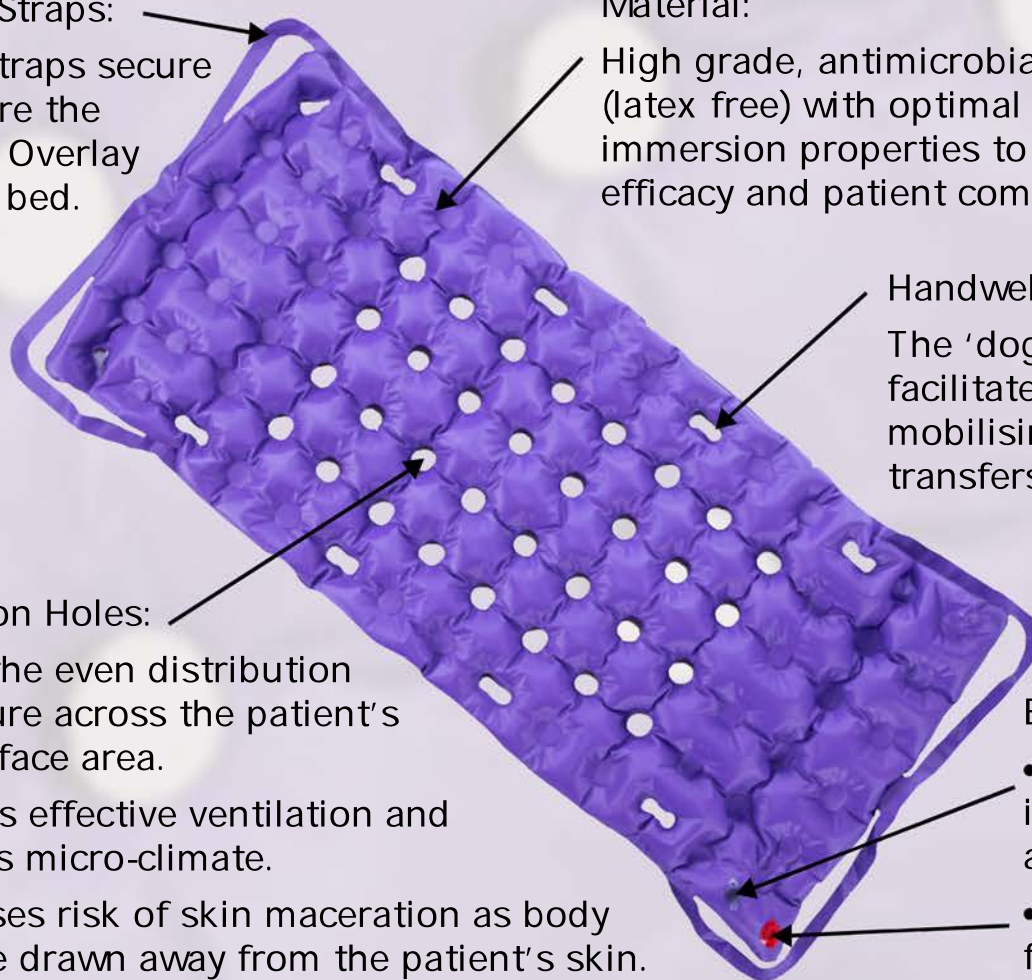

The 'dog bone' handwells facilitate easy log rolling, mobilising and patient transfers.

**Ventilation Holes:**

- aiding the even distribution of pressure across the patient's body surface area.
- provides effective ventilation and optimises micro-climate.
- minimises risk of skin maceration as body fluids are drawn away from the patient's skin.

**Easy Inflation:**

- Clear valve for inflation and adjustments.
- Red CPR valve for rapid deflation.

- Easy to use, low profile and cost effective.
- Antimicrobial agent incorporated which is effective against a wide range of micro-organisms including MRSA and E.coli.

## Clinically proven static air technology

Redistribution of pressure contours and supports around bony prominences while the ventilation holes allow for air flow which results in comfort and pressure injury prevention and treatment.

**For home and hospital style beds**

### Sizing Guide (When Inflated)

Code	Size (cm)	Weight Limit
H5 4000A	193 × 86 × 8 (single bed size)	270 kg
H5 4010A	193 × 120 × 8 (bariatric)	360 kg

All come standard with Double Action Air Delivery Pump for accurate inflation.
