

Stimulite Insoles

Stimulite shoe insoles are made from a medical grade product called Honeycomb Stimulite which has the ability to gently massage feet, stimulate capillary action and reduce fatigue. The honeycomb cells keep the insoles ventilated allowing them to be naturally antibacterial, antifungal and odour resistant.

Stimulite Insoles help to distribute weight uniformly to relieve pressure while providing exceptional stability and support. They have the ability to contour to the shape of feet and flex with movement for ultimate shock absorption. Highly durable and machine washable, Stimulite Insoles are available in two styles and a range of sizes.

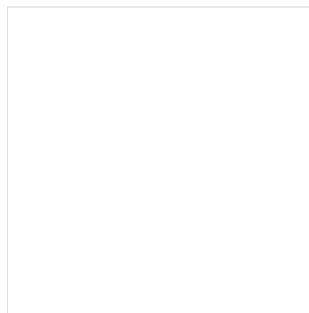

Comfort Insoles (Green):

Designed to gently massage feet to stimulate blood flow while circulating air and evaporating moisture, cooling feet with each step. Allows the user to 'feel' the massaging effect of the insole.

Sport Insoles (Blue):

Encapsulates air in the honeycomb cells to provide excellent shock-absorbing protection. More suited to impact activities such as running, people weighing over 90-100kgs, and those who are on their feet for a long period of time.

Europe	35 - 36	36 - 37.5	37.5 - 39	40 - 42	42 - 44.5	44.5 - 47

Fitting: Insoles can be slightly trimmed at the front to the desired shape if required. We do not recommend cutting the heel of the insole. Please note that Sport Insoles are a wider fit that is suitable for sport shoes, work boots, and gumboots.

Care Instructions: Insoles are machine and hand washable in cold water. While a small amount of laundry powder can be used, do not use any harsh chemicals such as chlorine bleach. Allow to air dry.
